

## Universal Input, Single Output Valve Controller (5A)

With Near Field Communication (NFC)  
Configurable with Android and Apple iOS Devices and Smartphones

P/N: AX020720

### Features:

- 1 universal signal input, user selectable as:
  - Voltage
  - Current
  - PWM
  - Frequency
  - Digital
- 1 output drives a solenoid, user selectable as:
  - Proportional current 0-5A
  - Proportional voltage up to Vps
  - Digital Hotshot
  - PWM signal
  - Digital on/off
- 1 auxiliary 0-5V output feedback
- +5V Reference output
- 12 or 24 VDC nominal
- PCB assembly with 4 2-pin push-in terminal blocks
- Multiple LED indicators
- Smartphone with E-Write NFC Android application configures the controller when placed in proximity. The application is also available for Apple iOS devices like iPhones.
- E-Write NFC provides flexible user configurability for application-specific input-output relationship with slope or time response.
- Protected and secure communication

### Ordering Part Numbers:

**AX020720** – Universal Input, Single Valve Controller, NFC, 1 8-pin Screw Terminal Block, PCB

**AX020720-PG9** - Universal Input, Single Valve Controller, NFC, 1 8-pin Screw Terminal Block, Metal Box, Strain Relief (1 PG9)

**AX020720-1.5M** - Universal Input, Single Valve Controller, NFC, 1 8-pin Screw Terminal Block, Metal Box, 1.5 M Cable

*If custom settings are requested, a unique part number will be assigned before ordering.*

### Description:

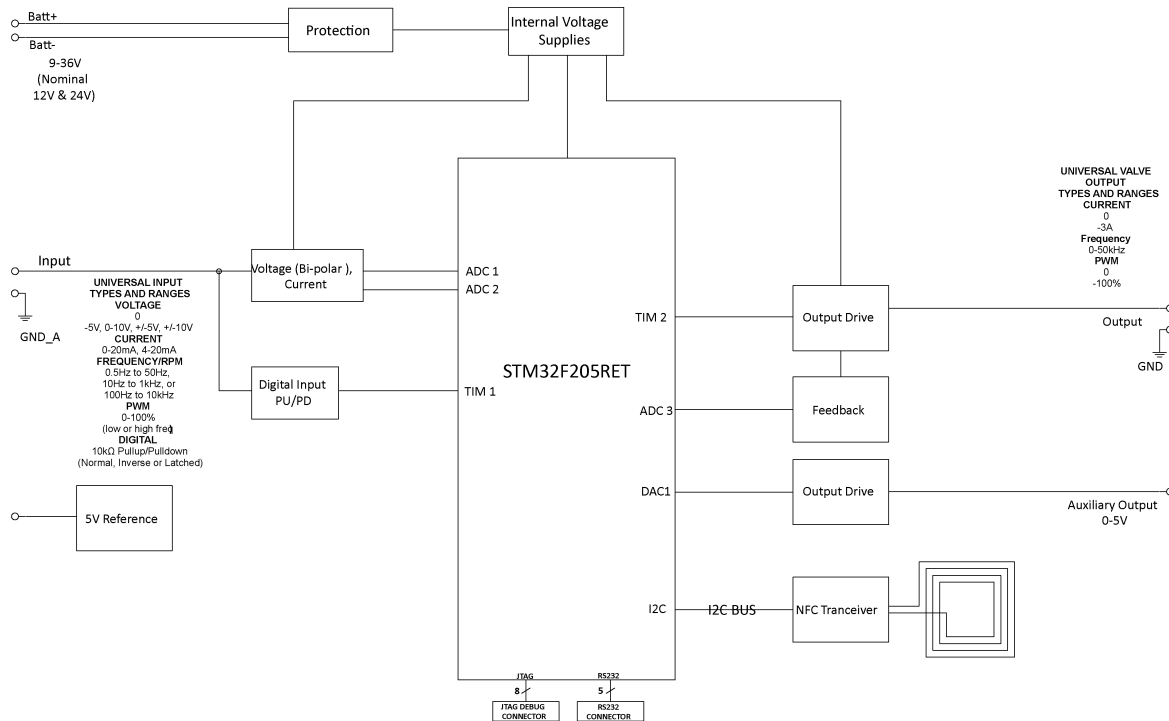

As a highly flexible controller, it accepts one command signal input and drives a solenoid up to 5 A. Many control profile parameters are user configurable. A PCB form factor is available. Operation is from -40 to 85°C. Designed to interface with 12 or 24 V battery power, it is suitable for machine and industrial applications.

Using Near Field Communication (NFC), the wireless valve controller is remotely configurable via a smartphone application. Bringing the two devices within 3 cm\* (1 inch) of each other, the NFC technology uses magnetic induction between two loop antennas to communicate within the globally available radio frequency ISM band of 13.56 MHz.

There are 3 models available: PCB Assembly (AX020720), PCB installed in a metal box with PG9 strain relief (AX020720-PG9), or a PCB installed in a metal box with 1.5 m unterminated cable (AX020720-1.5M).

\*The distance will vary with different phones.

## Technical Specifications

Specifications are indicative and subject to change. Actual performance will vary depending on the application and operating conditions. Users should satisfy themselves that the product is suitable for use in the intended application. All our products carry a limited warranty against defects in material and workmanship. Please refer to our Warranty, Application Approvals/Limitations and Return Materials Process as described on <https://www.axiomatic.com/service/>.

All specifications typical at nominal input voltage and 25 °C unless otherwise specified.

### Input Specifications

Power Supply Input - Nominal	12Vdc or 24Vdc nominal (9...36 VDC power supply range)
Protection	Reverse polarity protection is provided. Overvoltage protection up to 45V is provided. Overvoltage (undervoltage) shutdown of the output load is provided.
Universal Signal Input	Refer to Table 1.0 All inputs are user selectable.

Mounting	Program the unit before installing it in a control panel or metal box.  Mounting holes are sized for #6 or M3.5 bolts on the PCB Assembly P/N: AX020720. The bolt length will be determined by the end-user's mounting plate thickness. The mounting flange of the controller is 0.062 inches (1.5 mm) thick. If the module is mounted without an enclosure, it should be mounted vertically with connectors facing left or right to reduce the likelihood of moisture entry. All field wiring should be suitable for the operating temperature range. Install the unit with appropriate space available for servicing and for adequate wire harness access.
