

2 Bipolar, 8 Universal Signal Inputs Controller

CAN (SAE J1939)

Ethernet (Modbus TCP/IP) in Model AX032100 only

Two +5V references

DIN rail mount

P/N: AX032100, AX032120

Features:

- SAE J1939 CAN port with auto-baud-rate detection
- Ethernet port (Modbus TCP/IP)
- Two (2) signal inputs are selectable as bipolar voltage, current, digital or PWM signal types:
 - 0-5V, 0-10V, 0 to +/- 5V, 0 to +/- 10V;
 - 4-20mA, 0-20mA;
 - PWM, Frequency;
 - or Digital (Discrete Voltage Level).
- Eight (8) universal signal inputs are selectable as bipolar voltage, current, resistive, digital, PWM or frequency signal types:
 - 0-5V, 0-10V;
 - 4-20mA, 0-20mA;
 - Resistive
 - PWM;
 - Frequency;
 - or Digital.
- 12Vdc or 24Vdc nominal
- Two reference voltages (+5V) are available.
- Operates from -40 to 85°C (-40 to 185°F).
- Two LED indicators
- IP20
- DIN rail mount, screw terminal connections
- Configurable via the Axiomatic Electronic Assistant

Applications:

- industrial control panels
- power gen set engine control systems
- oil and gas equipment automation
- machine automation

Description: The Controller accepts two analog/digital signal inputs and eight universal signal inputs. The control can be networked to a SAE J1939 or a Modbus TCP/IP fieldbus (in Model AX032100).

Two +5V, 100 mA references are available to power sensor inputs. A rugged power supply interface accepts 12 Vdc or 24 Vdc nominal for battery powered machine applications. LED's indicate operational status. The enclosure is DIN rail mount. It operates from -40 to 85°C (-40 to 185°F). Standard embedded software is provided and is configurable using the Axiomatic Electronic Assistant (EA). The sophisticated control algorithms allow the user to program the controller for a wide range of applications without the need for custom software.

Technical Specifications:

Specifications are indicative and subject to change. Actual performance will vary depending on the application and operating conditions. Users should satisfy themselves that the product is suitable for use in the intended application. All our products carry a limited warranty against defects in material and workmanship. Please refer to our Warranty, Application Approvals/Limitations and Return Materials Process as described on <https://www.axiomatic.com/service/>.

User Interface – via CAN	To configure the controller for sophisticated control applications, the AX032100 setpoints can be viewed and programmed using the standard J1939 memory access protocol through the CAN port and the PC-based Axiomatic Electronic Assistant. The EA can store all setpoints in one setpoint file and then flash them into the unit in one operation. The setpoint file is created and stored on disk using a command <i>Save Setpoint File</i> from the EA menu or toolbar. The user then can open the setpoint file, view or print it and flash the setpoint file into the unit. The Axiomatic Electronic Assistant KIT, P/Ns: AX070502 , AX070505K , or AX070506K for <i>Windows</i> operating systems comes with a royalty-free license for use on multiple computers. It includes an Axiomatic USB- CAN converter to link the device's CAN port to a <i>Windows</i> -based PC. Refer to the user manual for details.
