**Description:** The DC-DC Converter provides regulated 48Vdc power suitable for instrumentation and controls operating in a battery powered system. For operation under the most harsh and demanding conditions, the unit is fully sealed and enclosed to protect against moisture, shock and vibration. Power from a battery or other source in the range of 9-60Vdc is converted to a 48Vdc output regulated to 3% and 1.3 Amp continuous current. Input and output isolation is provided. The unit is designed with extremely rugged surge and transient suppression in addition to sustained over/under voltage protection as well as inrush current control. With a nameplate rating of 60 Watts of output power, the DC-DC Converter has an efficiency rated at 89%.
