### Description:

The 4 Channel Strain Gauge

CAN controller accepts up to four 4-wire strain gauge connections. The input range is user selectable from +/- 19.5 mV to +/- 2.5 Vdc. It interfaces with the machine's CAN network (SAE J1939). The measurement rate is 2.5 scans per second and the update rate is 400 ms for all 4 channels. Standard embedded software is provided. Rugged IP67 rated packaging and a power supply input of 12Vdc or 24Vdc nominal suits applications in the harsh environment of mobile equipment with on-board battery power. All setpoints are user configurable using the Electronic Assistant®.

### Control Logic:

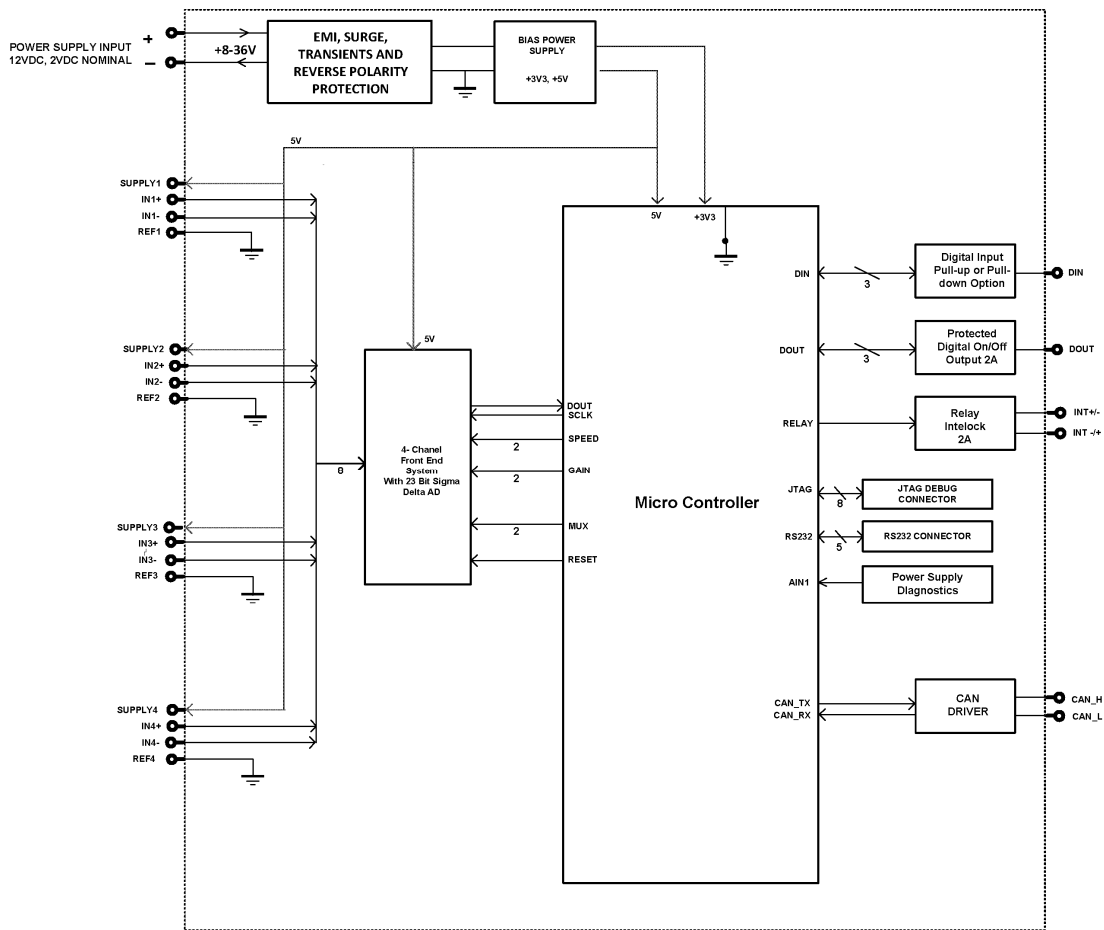

The AX200000 is a highly programmable controller - allowing the user to configure it for their application. Its input, logical and mathematical function blocks allow the controller to support a wide variety of load cells to fit customer's various applications.

All inputs and logical function blocks on the unit are inherently independent from one another, but can be programmed to interact in a large number of ways. The logical function blocks (software) are shown below.

The various function blocks supported by the module have configurable setpoints using the Axiomatic Service Tool, Electronic Assistant (EA).
